PRODUCT DEVELOPMENT · NOV 11 → DEMO DAY

loop. timeline to Demo Day

Two weeks, one in-person meeting. Everything else happens remotely on the task board (github.com/Studywithloop/loop-app) and the team WhatsApp. The goal for Demo Day: a working v2 that turns a real lecture into a feed and a real assigned video into topic clips with questions, plus a 7-minute pitch with a 3-minute live demo.

Wed 11	Sun 15	Mon 16	Wed 18	Sun 22	Tue 24	Wed 25
draft pitch	online check-in	deck due	poster fair	online run-through	in-person meeting	DEMO DAY

how we work remotely

- **Daily:** one line in WhatsApp by 21:00: what I did, what's next, anything blocking.
- **Board:** every task is an issue with your name label; move it to done and link your work.
- **Two video calls at 20:00**, run by Beatriz: Sun 15 (30 min, progress and blockers) and Sun 22 (45 min, full run-through).
- **Rule:** stuck for more than a day? Tag Beatriz on the issue; don't wait for the call.

Week 1 · Wed 11 – Sun 15 Nov build v2 + learn from the draft pitch

WHO	TASK	DUE
Beatriz	Present the draft pitch; turn feedback into board tasks; start the slides → feed generator (upload a PDF, get a feed)	Sun 15
Noor	Video clipper part 1: YouTube transcript → topic clips (45–120 s) with titles, as feed JSON	Sun 15
Ferdinand	Show ***clip*** cards in the app from feed JSON; fix the top issues testers reported	Sun 15
Dalya	Summarise the 7 testers' feedback; 10 interviews (students, a TA, a professor)	Sun 15
Bianca	Confirm Spain and IE student numbers with official sources; contact 5 professors for a pilot	Sat 14
Marcelo	Willingness-to-pay survey live (5 questions) and shared in class groups	Fri 13
Ghaya	Post the 9-post Instagram grid; first poster draft for the fair	Sun 15

Sun 15, 20:00 · online check-in: demo of each piece; agree on deck changes.

Week 2 · Mon 16 – Fri 20 Nov deck, poster, everything connected

WHO	TASK	DUE
Beatriz	**Submit the pitch deck** (48 h before Session 25), team CC'd; update financials with the survey results	Mon 16
Ghaya + Bianca	Final poster printed; run the poster stand at the fair	Tue 17 / Wed 18
Noor	Clipper + questions working end to end on 3 real course videos	Fri 20
Ferdinand	Questions after every 2 clips in the app; everything live on studywithloop.github.io	Fri 20
Beatriz	Generator live: a real IE lecture PDF becomes a feed in under a minute	Fri 20
Dalya	48-hour recall experiment (notes vs loop.), results ready; 20 interviews total	Fri 20
Marcelo	Survey results to Beatriz; Demo Day logistics checklist	Fri 20
Bianca	One professor agreed to a pilot (or a quote/letter of interest)	Fri 20
Beatriz + Ghaya	Demo Day deck: extend the pitch to ~6:00 for the 7-minute slot; write the 3-minute demo script	Fri 20

Sat 21 → Mon 23 Nov freeze, rehearse online, fix

WHO	TASK	DUE
Everyone	Practise your own part out loud at least 5 times, with a timer	Sun 22
Everyone	**Online run-through** (45 min, video call): full pitch with the timer, each speaker in order; demo shown on Noor's phone; list of fixes with owners	Sun 22, 20:00
Everyone	**Feature freeze** right after the call: what is live now is what we show on Demo Day	Sun 22, 21:00
Beatriz	Submit the Demo Day deck early, in case it's due 48 h before Demo Day (team CC'd)	Sun 22
Owners	Only the fixes agreed on Sunday; nothing new	Mon 23, 18:00

Tue 24 Nov · our one in-person meeting (2–3 hours)

The day before Demo Day, so this is rehearsal, not building. Bring laptops and both demo phones. Agenda: 1) full pitch + demo run-through with a timer, three times, each speaker in order; 2) Q&A drill, each person on their topic; 3) test the demo on a projector or TV setup; 4) only small fixes (slide text, timing); no code changes after the meeting.

Wed 25 Nov show

WHO	TASK	DUE
Everyone	**DEMO DAY:** 7-minute pitch + 3-minute live demo + Q&A (speakers as in the script)	Wed 25
Dalya	Write down all questions and feedback	Wed 25

After Demo Day close the course, keep the product alive

- **Wed 2 Dec · closing session:** short retrospective as a team: what worked, what we change.
- **December:** decide who continues; if we do, agree the first professor pilot for next term.
- **Next term:** pilot in one course, accounts and spaced repetition, professor dashboard (see the business & scaling plan).

Definition of done for Demo Day: a real lecture PDF and a real assigned video each become a working feed with questions, live on studywithloop.github.io; recall-experiment result and interview count on the traction slide; one professor interested; pitch rehearsed under 6:15.

loop. · internal team document · dates from the course calendar (deck due 48 h before Session 25; poster fair Nov 18; Demo Day Nov 25; closing Dec 2)
