PITCH DAY · TEAM VERSION

loop. who does what

Simple version so everyone knows their part. Everyone speaks once: Beatriz opens, presents the money and closes; each teammate presents the part they own. Total talk time ≈ 4:15, then questions. Full words in the script PDF.

Beatriz opens, money, closes | **Noor** live demo | **Ferdinand** solution · tech Q&A | **Bianca** market & competition | **Marcelo** team · logistics | **Dalya** traction · notes | **Ghaya** go-to-market · timer

before we go on

WHO	JOB
Beatriz	Runs one last timed run-through; has the deck open in Present mode
Noor	Phone charged, mirrored to the screen, studywithloop.github.io/app/ open on the demo feed
Ferdinand	Second phone ready with the same page, in case Noor's fails
Marcelo	Laptop, charger, clicker, HDMI/adapter; deck downloaded as PDF as a backup
Ghaya	Timer ready; final check of slide text and colours
Dalya, Bianca	Know your numbers by heart (traction; market and sources)

the script, slide by slide

#	TIME	SPEAKS	KEY LINE	Q&A BACKUP
0	0:00	**Beatriz**	"We turn the time students already spend scrolling into time spent studying their own courses."	—
1	0:10	**Beatriz**	A real story, then: "we only review when exams force us to."	Dalya
2	0:45	**Ferdinand, then Noor (demo)**	"Your course, as a 5-minute feed." **Noor: 20-second demo**: a card, a quiz, a wrong answer, swipe to reinforce.	Ferdinand
3	1:25	**Dalya**	"15 organic sign-ups, 7 testers, 3/5 on version 0.1, and we know what to fix."	Dalya
4	1:50	**Beatriz**	"Free to start, €4.99 for exam mode, €10 per student for universities. LTV €47, CAC €13: 3.5 to 1."	Marcelo
5	2:15	**Ghaya**	"One class at a time: class groups, ambassadors, professor pilots, then licences."	Ghaya

6	2:40	**Bianca**	“IE, then 1.83M students in Spain, 19.1M in the EU. Others need prompts or don’t know your course.”	Bianca
7	3:10	**Marcelo**	“Why us? We are the users.” Team on the slide; everyone smiles.	everyone
8	3:30	**Beatriz**	“€115k, €400k, €1.2M by year 3; break-even in year 3.”	Beatriz
9	3:50	**Beatriz**	“€400k for 18 months: product 45%, growth 30%, sales & ops 25%.”	Beatriz
10	4:05	**Beatriz**	“Every course. 5 minutes a day. Cool kids stay in the loop.” Stop at 4:15.	—

during the pitch

- **Ghaya** shows a discreet signal at 3:30 (“one minute left”) and at 4:15 (“stop”).
- **Hand over by name** (“Ferdinand will show you what we built”) and walk up as the previous speaker finishes.
- **Dalya** writes down every question and comment from the professor and the class.
- Everyone else: stand together, look at the audience, no phones except Noor and Ferdinand.

questions: who answers

TOPIC	ANSWERS	SHORT ANSWER
Why not ChatGPT / NotebookLM?	**Beatriz**	No prompts, knows your course, recall and review built in
Is the AI content accurate? How is it built?	**Ferdinand, Noor**	Only uses the uploaded material; every card links to its slide or timestamp; professor approval
Market size, competitors, professors	**Bianca**	Bottom-up market with sources; professor pilots next
Pricing, selling to universities	**Marcelo**	Free pilot term, then a licence per programme at €10 per student
Will students keep using it?	**Dalya**	Biggest risk; we measure week-2 return and run a 48-hour recall test
How will you get users?	**Ghaya**	Class groups, QR stickers, Instagram, ambassadors
Numbers, funding, use of funds	**Beatriz**	See the business plan: €400k, 18 months, three milestones

Afterwards (same day): Dalya posts the questions and feedback in the team repo (docs/PITCH.md); everyone turns them into tasks on the board.
